China was responsible for installing a massive 256 GW of that solar capacity. For context, it took until September last year to pass the 350 GW mark. This year, the milestone was achieved in...

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China's already operating 1.4 TW ...

The total solar capacity added from January to May 2025 reached nearly 198 gigawatts, marking a remarkable 388% increase from the same period in 2024, a year when China had already set a ...

As part of this initiative, it has now converted a former coal mining site into its largest single-capacity solar power plant. The Mengxi Blue Ocean Photovoltaic Power Station covers an ...

In recent years, outdoor solar panels have emerged as a vital component of China's renewable energy landscape. As the country strives to reduce its carbon footprint and transition to ...

Harness the power of the sun with our off grid solar system kit, providing reliable and sustainable electricity for remote locations, off grid homes, and backup power solutions.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

According to Electrek, China's 3 gigawatt Mengxi Blue Ocean Photovoltaic Power Station in the vast, remote Gobi Desert came online in early November. The plant is located in Inner ...
