Discover solar powered shipping containers with 10-50KW off-grid systems, lithium batteries & 25-year capacity guarantee. Ideal for solar powered AC and cold storage.

The battery energy storage system (BESS) containers are based on a modular design. They can be configured to match the required power and capacity requirements of client's application. Technical ...

Are you ready to partner with a terminal that prioritizes efficiency, clean energy, and community impact? Contact us at Long Beach Container Terminal today to join the mission for a ...

Working closely with the port authority, we developed a solar panel-based solution. After a successful pilot project in 2014, the design was refined for easier installation and a more compact size.

A plug-and-play solar power container is not only a deployment solution but also a long-term energy asset. Factory-standardized production improves component consistency and simplifies maintenance ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or taking up...

This second-generation design was adopted by the Port of Rotterdam, and since then, Straatman has delivered solar-powered systems to ports and terminals worldwide.

Solar energy can be seamlessly integrated into various aspects of port infrastructure. Installing solar panels on rooftops and parking structures not only generates clean energy but also optimizes the ...
