With money no longer cheap, subsidies a matter of politics and swirling allegations of fraud, a collapse could be coming soon.

But as my project progressed, I missed several signs that SunPower, along with much of the solar industry, was in a downward spiral.

The rooftop solar industry is navigating turbulent waters, with rising interest rates, policy changes like California's NEM 3.0, and concerns over financial and ethical practices clouding its future.

The solar industry is facing some serious challenges. After a decade of steady growth and excitement, many companies are now struggling to stay afloat. Unsustainable practices have ...

In this article, it will be argued that the current crisis in the smart glass industry is not only due to poor marketing, high prices and high barriers to entry in the construction industry.

When long-standing clean energy incentives are stripped away without warning, when legally established contracts are retroactively broken, and when bipartisan support for energy ...

These looming financial problems could topple the residential solar industry at a time when solar is supposed to be saving the world.

Residential solar installations declined 31% in 2024. Over the last year, industry titans like SunPower, Sunnova, and Mosaic Solar have filed for bankruptcy.
