As of early 2024, the global and Indian solar PV markets have witnessed a surge in activities across different segments of this value chain. Understanding the Solar PV Value Chain. ...

Midstream oil and gas refer to the stage of the energy supply chain that deals with the transportation and storage of raw hydrocarbons. It plays a pivotal role in ensuring that these resources reach their ...

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

The conclusions point out that the actors in the value chain and the factors that influence the sector's competitiveness are concentrated in several spheres, presenting dependency ...

In this study, a competitive photovoltaic supply chain network is devised in two phases. The first phase denominates three strategies of the game-theoretic approach to take into account the...

The main objective of this paper is to systematically review the "state-of-the-art" research on the solar PV chain (i.e., from product design to product end-of-life), including its main stages, processes, and ...

The prospects for U.S. PV and battery manufacturing are greatly improved by the IRA. Experienced manufacturing firms could look more at the PTC; while newer technologies, smaller ...

SEIA's supply chain dashboard does not track upstream mining but tracks the midstream processing of anode and cathode materials in the battery materials category and downstream assembly with ...
