The "One Network, One Road, One Port" project jointly constructed by Timor Leste and China, namely, the National Grid of Timor Leste, the Su'ai Expressway and the Tiba Port, has significantly improved ...

Discover how hybrid energy systems, combining solar, wind, and battery storage, are transforming telecom base station power, reducing costs, and boosting sustainability.

We deliver high-quality equipment, professional installation, and full technical support to help customers reduce energy costs and enjoy dependable clean power.

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy ...

Why is solar energy maintenance important in Timor-Leste? Maintenance tends to be limited to repairing malfunctioning system components, instead of preventative care or servicing, which can reduce the ...

Now, the system is live. It's a robust hybrid setup that intelligently uses solar power, stores excess energy in batteries, and only calls on the diesel generator as a last resort. It's ...

Submit your inquiry about hybrid electric systems, solar panels, solar cells, inverters, and energy storage applications. Our solar experts will reply within 24 hours.

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.
