The purpose of this White Paper is to document and inform the community about all of the potential impacts of Electric Vehicles (EVs) on the global stage, comprehensively covering topics ranging from ...

About Us: Specializing in high-density energy storage systems, Tiraspol serves EV manufacturers and grid operators across 23 countries. Our ISO 9001-certified facilities combine German engineering ...

Under new safety rules published Monday by China's Ministry of Industry and Information Technology, cars sold in the country must have mechanical releases on their door handles. The new ...

Hidden and electric door handles have been linked to deadly delays after crashes. China is outlawing them in 2027, and U.S. lawmakers are now eyeing similar rules.

Officials said the policy on the handles, which are common on Tesla's electric vehicles, aims to address safety concerns after fatal EV accidents in which they reportedly failed to operate.

China has banned hidden door handles on electric vehicles (EVs), making it the first country to stop the use of the controversial designs that were made popular by multi-billionaire Elon ...

We support you to improve electric vehicle safety according to the latest international standards. This includes our cybersecurity assessment for connected and automated vehicles components, ...

Electric vehicles safety, but challenges arise in assessing their viability. This article scrutinized the safety and environmental impact of EVs, and their charging infrastructure.
