What is the US energy storage monitor?

The US Energy Storage Monitor is offered quarterly in two versions- the executive summary and the full report. The executive summary is free, and provides a bird's eye view of the U.S. energy storage market and the trends shaping it.

How do I redeem the US energy storage monitor yearly subscription?

To redeem the yearly subscription, please contact Wood Mackenzie. The US Energy Storage Monitor is offered quarterly in two versions - the executive summary and the full report. The executive summary is complimentary to member companies and provides a bird's eye view of the U.S. energy storage market and the trends shaping it.

Where can I find energy storage industry data?

It is available individually each quarter or as part of an annual subscription. The quarterly reports from ACP and Wood Mackenzie are routinely cited by hundreds of media outlets as the authoritative source of energy storage industry data.

How much does storage cost in 2035?

By definition, the projections follow the same trajectories as the normalized cost values. Storage costs are \$147/kWh, \$234/kWh, and \$339/kWh in 2035 and \$108/kWh, \$178/kWh, and \$307/kWh in 2050. Costs for each year and each trajectory are included in the Appendix, including costs for years after 2050. Figure 4.

1 Background Battery storage costs have changed rapidly over the past decade. In 2016, the National Renewable Energy Laboratory (NREL) published a set of cost projections for utility-scale lithium-ion ...
