New tariffs on solar and energy storage imports are expected to increase project costs by up to 50%, delay deployments, and intensify sourcing issues. Reliable VFD manufacturers in China and flexible ...

In April 2025, the U.S. Department of Commerce finalized a series of steep tariffs on solar imports from Southeast Asia, citing unfair trade practices and tariff circumvention by Chinese manufacturers.

In December, the Biden Administration doubled tariffs on solar products from China. Section 301 tariffs are 50% for polysilicon, wafers, and solar cells for products imported from China.

In April 2025, the U.S. administration implemented a series of tariffs affecting a broad range of imported goods, including critical components for solar energy systems.

In 2018, Trump imposed Section 201 tariffs on solar panels imported from foreign countries, aiming to bolster American solar manufacturers. While American solar panel ...

The updated reciprocal tariffs effective April 2025 have led to notable price increases for solar panels, inverters, and batteries in the U.S., particularly for products imported from Asia.

Since 2018, the U.S. government has placed Section 301 tariffs on many Chinese products, including polysilicon, solar wafers, solar cells, solar modules, inverters, and other balance-of-module ...

Tariffs were imposed by former President Trump in 2018 under the 1974 trade act, Reuters explained, to protect the small US solar manufacturing sector against competition from low-priced imports made ...
