Engineered to protect critical energy components, our outdoor-rated waterproof metal cabinets offer robust protection for solar battery modules, lithium-ion systems, and emergency power storage units.

The system has an IP55 rating and C4 anti-corrosion level, making it suitable for outdoor use. Its plug-and-play design, along with modular and parallel connections, allows for easy expansion and ...

The Outdoor Cabinet Energy Storage System is a fully integrated solution that combines safe battery storage, intelligent power management, and weatherproof protection for solar and telecom applications.

Voltsmile's Outdoor Energy Storage Cabinet is engineered to withstand harsh environmental conditions, including extreme temperatures (-30°C to 60°C), heavy rain, dust, and corrosion.

All-in-one outdoor ESS solution with 40kWh LiFePO4 battery and 20kW hybrid inverter, ideal for C& I, microgrid, and grid-side applications. Supports solar charging, EMS control, and remote monitoring.

The AES 210HV is outdoor-rated and features liquid cooling and heating for reliable performance in extreme conditions. It features multi-layered safety measures, including fire suppression and ...

Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet.

With IP54/IP55 protection, anti-corrosion design, and intelligent temperature control, they are ideal for telecom base stations, remote power supply, and containerized microgrids. Our outdoor cabinets are ...
