Which 3G network is used in Yemen?

In 2012, Yemen mobile implemented ZTE equipment besides Huawei as well as using LG-Nortel network in some eastern parts of the country. Yemen Mobile is the first 3G company in Yemen that provides CDMA2000 1x and 1x EV-DO services.

Which countries have the best 5G coverage?

The really big standout is India which seems to have blanked the country in 5G coverage within just the last 2 years. This contrasts strongly with it's neighbours like Pakistan, Myanmar and even large parts (of mostly sparsely populated) China. Europe also has good coverage up until you reach Ukraine and Belarus and into Russia.

What is the 5G map?

The 5G Map grew into a resource that included 233 providers with over 145,000 deployments in 142 countries. Now that 5G is so fully present in so many places, we're shifting our focus to other analyses, including spotlights on the latest emerging technologies and markets where connectivity is falling behind. Download the final 5G data.

Which is the first 5G phone from China?

The world's first phone capable of using 5G connectivity, the Chinese ZTE Gigabit Phone, was unveiled at the Mobile World Congress (MWC) on Feb 28, 2017. China's ZTE completed the functionality test of 5G standalone architecture in Sep 2018. China's three major state telecom operators rolled out 5G nationwide coverage (50 cities) on Nov 1, 2019.

* See reference to 5G NR (New Radio) frequency bands which are defined with prefix of "n"; *
Note - This data is by no means authoritative and should be used as reference/guideline/general information.

In this paper, the planning of 5G wireless access network is proposed in urban area of Taiz city, Yemen where the cells within the city divided into small cells and focused on the densest areas in city.

For a personalized view of internet access where you are, visit Speedtest Coverage Maps in the Speedtest App for Android and iOS. For an in-depth look at performance in your area, ...

The information below is part of the mAccess Diagnostic Tool and is intended to help assess foundational components of Yemen's digital ecosystem using indicators on internet availability, ...
