Horad New Energy is a reputable manufacturer and supplier based in China, offering a wide range of 300MW Automatic Edge Taping Machine products. With our advanced production facilities and ...

Lifting equipment not needed - Equipment is only necessary for projects more than 500kW. Installation time and cost - Locate modules as desired without customizing rails. Installation time is 30-50% less. ...

Solar photovoltaic bracket roll forming machine is a full automatic line to produce the solar photovoltaic bracket strut, which is a special bracket designed for placing, installing and fixing solar panels in ...

The ECOTAPE A is a fully automatic inline edge taping machine designed specifically for solar panels. It automates the application of tape along the edges, effectively replacing the traditional silicone ...

The invention discloses edge sealing equipment for a photovoltaic module in the technical field of new energy, which comprises a frame, wherein the front side and the rear side of the top...

Servo-driven sealing modules apply and press tape using soft materials to effectively protect cells. Supports one-click switching for various module sizes, ensuring sealing without wrinkles, bubbles, or ...

Explore the critical role of solar taping and trimming machines in PV module production. Learn how this equipment works and how to choose the right model.

The servo-driven punching and cutting system allows for exact placement of holes and slots required for solar mounting brackets, while the automated stacking and packaging system ...
