"Export MPAN" refers to an export Meter Point Administration Number, which is the 13-digit number that solar homes must have before they can start exporting electricity to the grid.

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data.

Export License: Photovoltaic modules themselves generally do not require an export license, but if they involve energy storage components such as lithium-ion batteries, it is necessary ...

For in-quota merchandise, use entry type code 02, 06, 07, 12, 23, 32, 38, or 52. For over quota merchandise, use non-quota entry type, e.g., entry type 01. The merchandise covered by the ...

Ever tried explaining photovoltaic panel classifications to customs officials? It's like teaching quantum physics to a golden retriever - absolutely essential but painfully technical.

Data source: U.S. Energy Information Administration, Form EIA-63B, Monthly Photovoltaic Module Shipments Report Note: Includes both domestic shipments and exports.

I thought the MPAN number was assigned to a home, but since we do not need to use the same company for import and export, then it makes sense to different import and export numbers.

Can be used for an export declaration. Photovoltaic cells assembled in modules or made up into panels; Examples: - Polycrystalline silicon solar panel (60-cell, residential 300W) - ...
