Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's ...

This isn't limited to solar farms; the updates also cover other renewable energy projects, such as wind farms and biomass plants, providing a comprehensive picture of the UK's renewable ...

Founded by Joe Warren, the patent-pending product uses an integrated battery and control system to store the free electricity generated from solar panels during the day and then release the ...

We're inviting bidders to help us deliver purpose-built solar photovoltaic (PV) farms for the Tube network, in a move to make the energy we use and rely on cleaner, greener and potentially ...

TRANSPORT for London (TfL) plans to build giant solar farms to power the capital's underground's trains, with leafy commuter towns at the end of lines likely to host the new infrastructure.

This marks a significant step towards TfL's goal of running the capital's transport network on 100% renewable energy by 2030. A new solar facility will be built in Longfield, Essex, by EDF ...

Through spatial mapping and access to technical support the London Solar Opportunity Map accurately highlights opportunity areas for installing solar and storage in homes and businesses.

Iconic London landmarks including Tower Bridge, Hampstead Heath, and the Barbican Centre will be powered by renewable electricity from a new solar farm in Dorset. The City of London Corporation,...
