BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed on Thursday, as some...

The current trend suggests that Europe will fall short of its goals, hosting 723 GW of solar PV by 2030, compared to the required 750 GW. The analysis comes as solar's performance for ...

As a consequence, some European companies have either reduced their operations, announced that they would prioritise production in other international markets, in particular the US, or even ...

Europe must urgently reclaim its solar manufacturing capabilities through innovation, strategic collaboration, and bold policy action, or risk losing energy sovereignty.

EU solar manufacturers have warned for months that they face an existential crisis with respect to China's near-total dominance over global supply lines, which has caused a supply glut of ...

Europe is in a "price war" with China, said Gunter Erfurt, CEO of Swiss panel maker Meyer Burger, which plans to close its loss-making German solar module factory, citing an absence of ...

EU manufacturers of solar panels are swiftly going out of business, ...

EU manufacturers of solar panels are swiftly going out of business, as cheaper Chinese imports outcompete them. The European solar industry is collapsing despite the EU's energy ...
