We offer various wind energy thermal spray coatings that enhance component performance by improving material properties and protecting against corrosion, wear, high-temperature oxidation, ...

Teknos has developed paints and coatings specially for wind turbine blades. Our turbine blade coating product family consists of a full range of products, from priming to finishing paints, and putties as well ...

Extend wind turbine blade life with spray coatings that enhance durability, reduce wear, and improve efficiency in harsh conditions.

Typically, wind power paint is applied during manufacturing or maintenance phases. It forms a protective barrier that resists cracking, peeling, and chemical degradation over time.

Several test rigs has been operation since 1970. Most known are Saab, Polytech, Uni Limerick, Uni Strathclyde, Fraunhofer IWES. Glass fibre reinforced epoxy specimen with a coating system. Length ...

We develop high-performance coatings for every component of your wind turbines, from towering blades to submerged foundations, maximizing uptime and safeguarding your assets even in the harshest ...

We partner with many of the most important rotor blade manufacturers across all continents. However, this also means that our products must function as reliably in the deserts of Arizona as they would in ...

With our coatings for wind turbines, blades, towers, substations, foundations, and other accessories, you'll see increased life cycles, superior corrosion protection and reduced maintenance costs.
