---

Two pioneering lifting technologies are promising significant cost savings and operational efficiencies in the offshore wind industry, particularly for smaller, older jack-up vessels.

Uplifter, in partnership with the renowned manufacturer Aerolift, offers customized solutions for lifting, moving, and precisely positioning large components in the wind power industry.

CLS Wind's system enables faster and more cost-effective maintenance, minimizing downtime and expediting revenue generation.

Since 2021, wind energy experts have seen the emergence of repower into the wind industry. That's where governments decided to give credits to tear down old wind farms and replace ...

The Davis Wind Lift System is safer, can go higher, and is a less costly method than a conventional large crane to performing all the top out lifts. Contact us for more information regarding ...

Explore the pivotal role of lifting and spreader equipment in renewable energy projects, with key considerations and real-world applications.

With our specialised heavy lifting solutions, custom designed lifting attachments, and high capacity material handling equipment, we are able to facilitate a seamless and efficient ...

Our lifting solutions designed for wind power operations, including swivel lifting points and PSA anchors for blades, nacelles, and towers. Ensure safety, efficiency, and corrosion resistance in turbine ...
