Continental Fan is a leading supplier of wind turbine cooling fans for nacelle ventilation, GCU (generator control unit) cooling, cabinet cooling, and tower ventilation.

The Whirlybird<sup>®</sup> turbine has an exclusive vari-pitch base that adjusts to a 12/12 roof pitch for use on many roof applications. When installed properly, the Whirlybird<sup>®</sup> Turbine reduces energy bills and ...

Whether on Onshore wind turbines or at Offshore wind parks, with extremely salty air and high risk of corrosion - Rosenberg fans and air handling units meet the highest requirements!

The Hurricane(TM) Turbine is a wind driven roof exhaust fan. This natural turbine ventilator is an alternative to traditional industrial ventilators that perform poorly and consume energy.

Roof turbine ventilators use the wind to exhaust hot, stale air from commercial buildings and replace it with cool, fresh air.

Fans for wind turbines from ZIEHL-ABEGG represent the very best of ventilation, control and drive technology. The high-performance fans make it possible to realise more powerful wind turbines.

Benefits of Roof Turbine Ventilators  
Wind-Driven Turbine Ventilators  
Powered Turbine Ventilators  
Combining Roof Wind Turbines with Industrial Fans  
Two types of roof turbine ventilators are available. The first type of roof wind turbine is completely wind-driven. This ventilator turbine is the most efficient and has no electrical or wiring costs. Although wind-driven turbine ventilators are most effective when there is a wind speed of at least 10 miles per hour, the roof turbines will still op...
