Discover the 5 biggest solar power plants in the world (2025). Learn their capacity, country, and role in shaping global renewable energy.

From China to Dubai, we explore the top 10 largest solar farms in the world, assessing both capacity and investment

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

Talatan Solar Park (in Gonghe County, Qinghai, China) is the largest solar park in the world with a capacity of 16,000MW as of 2023 and a planning area of 609 km², which is close to the land area of ...

The Noor Abu Dhabi Solar Power Project is the world's largest single-site solar farm, with a 1.2 GW capacity covering 1,977 acres. That means it covers the widest expanse of land with ...

The largest photovoltaic solar farm to date is Solar Star, a 579 MWp facility near Rosamond, California. Fully completed in June 2015, it currently holds the record for the world's largest installed ...

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....
